

WEBATHON 1.0 RULE BOOK

The logo for Unstop, featuring the word "unstop" in a bold, sans-serif font. The "un" is white and set against a dark blue circular background, while "stop" is dark blue.

PROBLEM STATEMENT

*Welcome to Round 1 of PixxelHack Webathon
Get ready to put your skills to the ultimate test!
This round is all about precision, creativity, and
implementation. You'll be given a Drive link
containing a curated set of resources —
including images, videos, and design references.*

*Recreate the provided design elements as
accurately as possible in your own website. It
must be fully responsive, feature-rich, and
functionally complete. While the structural
elements and components must reflect the
provided resources, the overall layout, color
scheme, visual style, and user interface design
are completely up to your creativity.*

*We encourage you to go beyond replication —
explore thoughtful enhancements that elevate
the user experience, add smooth animations,
intuitive interactions, and anything else that
adds polish, without straying too far from the
design intent.*

*Think of yourself as a pixel-perfect artisan who
can also bring a touch of magic to their
creations.*

Submission Guidelines

To ensure fair evaluation, all submissions must adhere to the following conditions to be considered valid:

1. Strict Adherence to Time Limit: Submissions will only be accepted between 6:00 PM IST and 9:00 PM IST on August 02, 2025. Any submission received after 9:00 PM IST will be disqualified.

2. Working & Deployed Application: Your solution must be deployed and publicly accessible via a live URL. This could be on platforms like Netlify, Vercel, GitHub Pages, or similar. The deployed application must be fully functional and accessible without requiring any special setup or credentials (unless specified otherwise for unique features).

3. Source Code Repository: You must provide a link to a public GitHub repository containing all your source code. The repository must be accessible and include all necessary files for the project to run. Crucially, no commits made to the repository after 9:00 PM IST on August 02, 2025, will be considered for evaluation. Any commits after the deadline may result in disqualification. The repository should have a clear README.md file with all necessary description.

Mandatory Features for a Valid Submission

For your submission to be considered valid and move forward to the judging phase, it must meet the following minimum criteria:

1.RESPONSIVENESS : Any layout breakout or non-responsiveness will be severely punished.

2.FEATURES : At least 3 elements among the given element list must be implemented.

Judging Criteria

Submissions will be evaluated based on the following:

1.Design Accuracy: How closely the submission matches the provided design mockups and assets.

2.Responsiveness: How well the layout adapts to different screen sizes and orientations.

3.Innovation/Enhancements: The quality and impact of any creative additions or improvements beyond the basic replication. (e.g., subtle animations, improved accessibility features, minor functional enhancements).

4.Code Quality & Best Practices: Readability, organization, adherence to web standards.

5.Mystery Element(will know when elements would get released): A special Mystery Element will be revealed along with the resources. Your challenge is to integrate it cleverly and meaningfully into your website. The way you implement this element will play a key role in the judging.
